Fiber-Clean® Towelettes

A LANscape®
Solutions Product

features and benefits |

Pure cleaning agents	Effective and efficient cleaning
Contains no water	No residue
Two times safer than IPA	Improves worker safety
Recyclable "pop-up" dispenser	Eliminates spills, reduces pollution

Corning Cable Systems Fiber-Clean® Towelettes are specifically designed to improve the efficiency of cleaning telecommunications cabling. More economical, convenient, safer and superior in terms of cleaning properties versus the traditional cleaners used for gel removal and fiber splicing, this intelligent cleaner contains 100 percent pure cleaning agents. The clear, non-slimy liquid evaporates quickly and easily removes buffer tube gels, waterblocking compounds and contaminants on optical fiber prior to splicing and connectorization.

The convenient "pop-up" dispenser contains pre-moistened towelettes and economically replaces gel removal cleaners in individual foil packets, sprays and refillable pump bottles. This eliminates spillage, waste and minimizes solvent emissions, thereby reducing VOC pollution. This product is two times safer (Higher Flash Point) than isopropyl alcohol (IPA), thereby improving worker safety. Packaged in a recyclable container, Fiber-Clean Towelettes eliminate the need for various cleaning products and are one-third to one-half the cost of competitive products.

Fiber-Clean® Towelettes

A LANscape®
Solutions Product

specifications |

Appearance	White towelettes saturated with clear liquid
Towelettes	Synthetic blend, 6 x 7.5 in
Clear Liquid	A mixed aliphatic hydrocarbon (polar/non-polar) based cleaner with 0% water
Environmental	Contains no ozone depleting chemicals (ODC), chlorinated solvents, CFCs or HCFCs
Compatibility	Tested for stripping force with most common fiber coatings in accordance with Telcordia GR-20

ordering information |

Part Number	Description
FC-45-1	45 Towelettes (6 x 7.75 in) in a “pop-up” canister (6.75 in H x 4.0 in W)
FC-45-12	Case of 12 “pop-up” Canisters
