

## Biographical Information

**Jaymin Amin, Ph.D.**

Vice President, Technology & Product Development  
Corning Specialty Materials

Dr. Jaymin Amin was elected vice president, Technology and Product Development, Specialty Materials, in January 2017. His responsibilities include all aspects of product and process development, product engineering, and commercial technology for the Corning® Gorilla® Glass business.

Amin joined Corning in July 1997 as a senior research scientist, focusing primarily on novel fiber and planar waveguide-based components for telecommunications applications. He has been with Specialty Materials since 2004.

Amin is an author or coauthor of more than 45 technical publications and has filed several patents.

He graduated from Glasgow University in the U.K. in 1992 with a master's degree in optoelectronics and laser physics, and earned a doctorate in optoelectronics from Southampton University in 1996.
